

A declaration states the rule. A receipt proves one exact use.

A runnable composition of an externally evaluated RSL-MEDIA declaration, a bounded consent grant, a user-verified exact-action ceremony, and an executor that consumes the authorization once.

FROM STANDING DECLARATION TO ONE-TIME EXECUTION

EXECUTABLE ACCEPTANCE CONTRACT

PRESENTED CONDITION	RESULT	REASON
Exact declared use with all pinned evidence	EXECUTE	All constraints cover the signed action; one reservation wins.
Same action replayed or independently re-signed	REFUSE	The action digest is already reserved or consumed.
Campaign, territory, purpose, or asset changed	REFUSE	The signed grant no longer covers the action.
Action changed after human authorization	REFUSE	The WebAuthn challenge and action digest no longer match.
Declaration is prohibited, absent, or stale	REFUSE	No permissive fallback is inferred.

EXACT BOUNDARY

- Does not establish rights ownership or legal permission.
- Does not prove the approver understood the display.
- Does not assess output safety, accuracy, or quality.
- Does not claim RSL-MEDIA conformance or endorsement.
- Depends on a trusted external evaluator for the current declaration view.
- RSL-MEDIA 1.0 is a draft that states it must not be used in production.

RE-PERFORM IT OFFLINE

```
node examples/rsl-media-clearance/demo.mjs
```

One exact use executes. Replay, an independently re-signed duplicate, action mutation, changed terms, missing declaration, and stale declaration all refuse.
